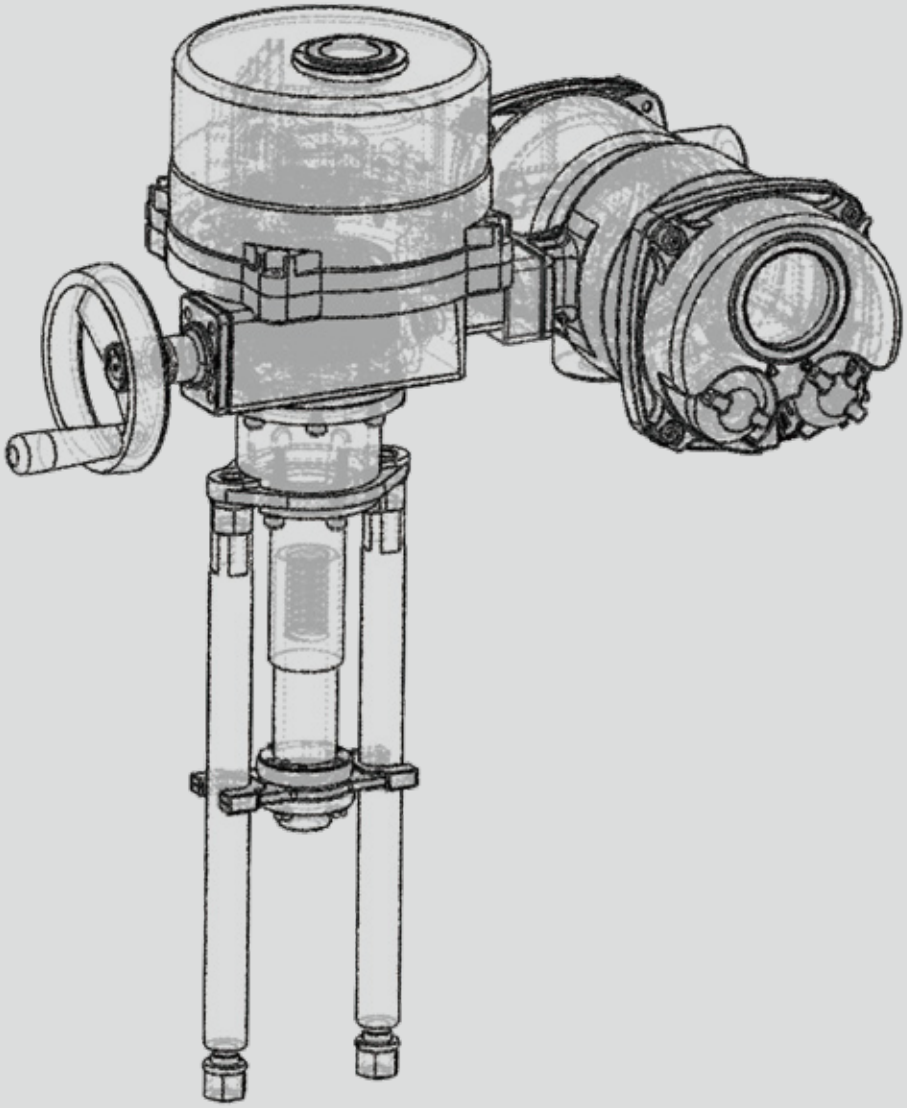
ŌMEAX



LINEAR ELECTRIC ACTUATOR

FM 522775 EMS 595200 OHS 595201

CE RoHS REACH

Omeax established itself as a electric actuator manufacturer in 2007. With main focus on the design and development of electric actuator, we have been providing our product and services worldwide. Our quality and technical innovation have contributed to the growing industry recognition and made collaborations with many of the industry elites possible.

Our customer base include countries of Europe, United states, Australia, Africa, South East Asia and Middle East. With application to water treatment, HVAC, petroleum, chemical, electronics, light industry, food, medicine, textile, papermaking, hydropower, ship, smelting, new energy and so forth.

Omeax is an ISO 9001, ISO 14001 and OHSAS 18001 certified company. Most importantly, Omeax electric actuators mark with CE, CSA, explosion-proof (ATEX, IECEx), IP68, RoHS and REACH. Most are given by internationally renowned certification bodies such as TUV, NEPSI, DNV, CSA, SGS, BSI and such. There are currently over 40 product patents that Omeax possesses as of now.

As one of the leading electric actuator manufacturer, we always adhere to "CUSTOMER FIRST, RESEARCH & INNOVATION, CONTINUOUS IMPROVEMENT, TEAMWORK" concepts.

LINEAR OVERVIEW

Omeax's linear series are separated into the ELM series and TFAX series. Along with the adaptation of 1 + N concept to maximize the value to meet the needs of different areas. Over the years, it has experienced various fields of domestic and foreign markets practice and application while gotten the reward of multiple national and inter-national qualifications. Its performance has been improved and upgraded in the cruel competitive nature of the business. Nowadays, they are as good as ever in all areas of the market.

PATENTED TRANSMISSION MECHANISM DESIGN

ELM010~080 series of electric actuators equipped with patented manual / electric switching function. Under the electric state, the actuator will automatically switched to manual control any time the handwheel is being pushed forward. And the handwheel will not rotate with the motor to ensure the operator's safety. Under the manual state, all it takes is to pull the handwheel to switch to the electric operation.

ELM100 ~ 250 series of electric actuators equipped with manual / electric automatic switching function. No clutch design so that the handwheel can be rotated when it's operating as there's no interference. Thus ensures the operator's safety. Such mechanical design will be the mainstream in the future.

SELF-LOCKING PROTECTION

With high-strength anti-rust drive screw and copper alloy wear-resistant drive nuts constitute the output unit of the actuator, it changes the rotary motion into linear motion. Such mechanism adopts the self-locking function, thus satisfies the self-locking needs when the valve is in the greater pressure situations.

LINEAR CHARACTERISTICS & PERFORMANCE

CHARACTERISTICS

The output unit of the actuator is provided with a bidirectional disc spring device. With a certain preload, ensures the longer period of time of being opened or closed of the valve. Also to reduce the valve pressure instability for the impact of the actuator.

INTERCHANGEABLE CONNECTING BOLTS

According to the different thread of the valve thread connection, the actuator connection bolts can be designed for different thread connection specifications. Can be quickly replaced for easier and faster operation.

USER INTERACTION INTERFACE

Intelligent type is equipped with brand new UI control interface, with the specialized remote control, achieves a variety of functions of the actuator configuration operation. Supports multi-language, satisfies all kinds of demands from the customer. It can also be customized based on special requirements.

ENVIRONMENTALLY FRIENDLY

Can be equipped with DC motor and drive technology, also able to receive solar or wind power equipment power supply thus minimized the impact to the environment to the fullest extent.

LINEAR SAFER MORE RELIABLE & STABLE

OPERATIONAL SAFETY
F grade (H grade is optional) insulation motor. The motor windings are equipped with temperature control switches to sense the temperature of the motor and provide over temperature protection, which ensures the operational safety of the motor.

ANTI-HUMIDITY RESISTANCE
Installed with heater inside the actuator used to remove the internal condensation which cause damages to electrical parts.

PHASE PROTECTION
Phase detection and correction functions avoid the actuator being damaged by connecting to the wrong power phase.

VOLTAGE PROTECTION
Protection against high and low voltage situations.

OVERLOAD PROTECTION
The power will automatically shut off when valve jam occurs. Thus preventing further damage to the valve and actuator.

OPERATIONAL DIAGNOSIS
Intelligent actuators are equipped with multiple sensing devices. With the functions of real-time reflections of the control signal received by the actuator, fault alarm, operating parameters, status indication and other status. Multi-diagnostic function can locate the fault, thus making it easy for the users.

PASSWORD PROTECTION
Intelligent actuators possess classifiable password protection, which can be authorized to different operators to avoid misuse which causing the actuator failure.

WORKING ENVIRONMENT

ANTI-CORROSION PROTECTION	Epoxy resin enclosure, can be NEMA 4X, customer-special painting is available. Can be customized according to customers' needs.
INGRESS PROTECTION	IP67 is standard, IP68 is optional. IP54 for TFAX series. Can be customized according to customers' needs.
FIRE-PROOF GRADE	High temperature fireproof enclosure meets requirements in different situations.Can be customized according to customers' needs.
AMBIENT TEMPERATURE	Temperature range is from -20 ℃ … +65 ℃. TFAX series is: -15℃~+60℃
RELATIVE HUMIDITY	≤ 95 %（25 ℃）

CONTROL MODE LINEAR

NON-INVASIVE CONTROL

Non-through-the-shaft magnetic switch design, it is controlled by the Hall device inside the actuator. Equipped with local control / remote control / prohibit knob, and open / stop / close knob, accommodating with the indicator light and LCD screen to achieve non-invasive field control operations.

SCREW AND NUT ASSEMBLY

Using high-strength steel rust-proof screw and high wear-resistant copper alloy nuts. Each pair of screw nuts are tested before installation to ensure that the installation of the smallest gap, and the maximum efficiency of the transmission torque.

MANUAL OPERATION

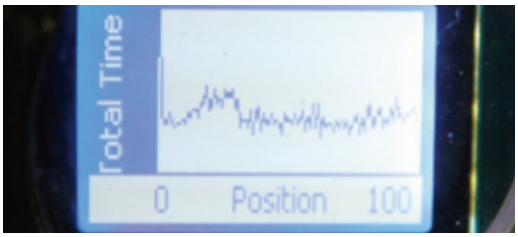
Full range of products are equipped with hand wheel operating mechanism to facilitate the commissioning and emergency manual operation, manual / electric automatic switching, safe and reliable.

INFRARED REMOTE CONTROL

The intelligent type actuator is able to provide different remote control based on different application requirements. Such as portable infrared remote control in ordinary locations and explosion-proof remote control for hazardous locations.

DATA MONITORING VS MANAGEMENT LINEAR

Super intelligent type actuators adopting high-performance micro-processors, real-time collection of valve position, torque and other operational information. Logical calculation truly reflects the operating status. Real-time monitoring & managing data provides references for the actuator maintenance.

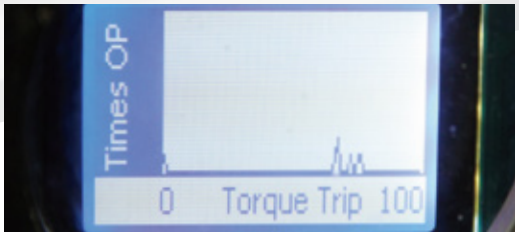


TIME-POSITION CURVE

The curve shows the running trend of the actuator, and the number of times the actuator has been passed at the corresponding positions.

AVERAGE TORQUE CURVE

It records the average output torques in the corresponding positions of both OPEN and CLOSE directions. The operating load of the actuator can be detected via the curve.



OPERATION TREND CURVE

The curve shows the cumulative number of positions corresponding to the control signal received by the actuator thus far. It enables the clients to understand the overall controlling trend of the actuator.

LINEAR INSTALLATION & MAINTENANCE

Optional double sealed structure of the wiring chamber. The internal electrical devices are guaranteed to be in a perfectly sealed protection when the actuator is performing on-site installation and debugging.

α shrapnel terminal block, doesn't need to install a special wiring copper ring and can be directly connected. On-site installation is more convenient.

Seal off lubrication design, without regular grease supplement, life-long maintenance-free.

HVAC SERIES LINEAR

TFAX series linear mechanism, mainly used to drive HVAC two-way valve and three-way Francis valve. The force range is 500N ~ 3000N, using high-performance AC reversible synchronous motor to ensure that the actuator can run uninterrupted. The adoption of high steel strength gear and screw effectively enhance the service life. Status indicator and movable valve position indicator allow you to observe the current opening and status from different angles. With the unique code design makes the valve positioning more accurate. Thus making the TFAX series actuators can be widely and effectively used in the field of HVAC.

Characteristic:

A key setting: The “A key” is used to setting the stroke after the installation of the valve. As it will automatically enter the running state.

Stem protection: The actuator will automatically function for a few seconds every 24 hours after powered on when idle for a long time. This can effectively reducing the valve internal components rust stuck phenomenon.

Multiple interfaces: The TFAX-040 series has a replaceable interface for changing different valve interfaces without changing the bracket.
Scale indication: The scale can be adjusted up or down to accommodate different gate positions.

Disc spring structure: With disc spring structure, with a certain preload to ensure that the gate can be closed for a long time.

Material selection: ABS material outer box and the main body of aluminum-magnesium alloy, to ensure safety and sturdy while reducing the weight of machine structure.

Power switch: The power switch located under the main body is conducive to manual operation and equipment debugging.

SERVICES

Flowinn's professional service team is ready to provide users with comprehensive services and professional technical supports at all time:

- No matter it is by phone, mail or on the site, we are standing by for your inquiry.
- Stable delivery time.
- On-site installation and debugging.
- Regularly follow up our products status and maintenance.
- We provide training for structure knowledge, operation, debugging, maintenance and more.

CUSTOMIZED PRODUCTION

AS TO Omeax, THERE IS NO SUCH THING CALLED IMPOSSIBLE.

FOR SPECIAL REQUIREMENTS, WE PROVIDE CUSTOMIZED SOLUTIONS.
