

OMAX

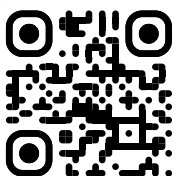

SIMPLIFIES LIFE !

Our presence in the world

**YOUR WORLDWIDE
PARTNER FOR INDUSTRIAL
VALVES & FITTINGS**

We operate all over the world !
Our raw material : water and all fluids.
Our goal : meet all your valve needs.

OMEAX GROUP HEADQUARTERS

1 rue Dewet
71100 Chalon-sur-Saone - FRANCE

CERTIFICATS

Our vision, our expertise

Water is essential for our daily life

It is very important to assure its accessibility and quality, and to manage its pressure and flow to preserve our planet and achieve sustainable growth.

We offer complete solution for water, pressure management and flow control.

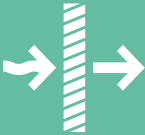

Omeax has been growing for more than 10 years in valve industry with our worldwide partners, on 3 major market challenges :

Shutoff

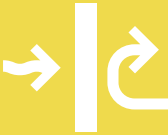

We offer various shutoff solutions with our butterfly valves, gate valves, globe valves, ball valves, knife gate valves with electric, pneumatic or hydraulic actuator.

Control

With our pressure regulator and control valves, our client could achieve desired pressure, flow rate and temperature in his system, to reduce consumption of energy.

Non return

We manage flow return with our different type of check valves.

We are specialized in below fields

We adapt our reponse to the precise needs of each client, thanks to our complete expertise in the cycle of an industrial valve project.

Technical study

R&D and new product development

Costing & Negotiation

International partner relations

Global logistics

Administration and formalities

Short deadlines, responsiveness, agility

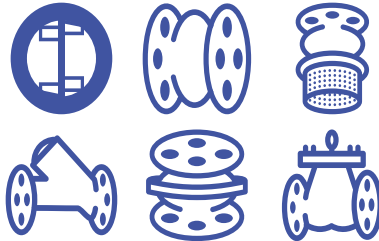

Dedicated team to manage whole project

Water supply / Waste water

Check valves

Wafer double door check valves - Axial guided check valves
Foot valves - Ball check valves - Membrane check valves
Flange swing check valves

Actuators

Electric actuators - Pneumatic actuators

Waste water system

Instrumentation

Matic

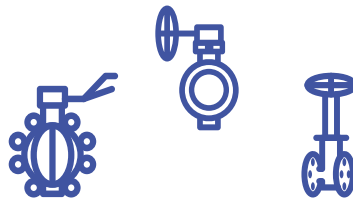

Expansion joints

Rubber expansion joints
Dismantling joints

Shut off valves

Centric butterfly valves - Eccentric butterfly valves
Gate valves

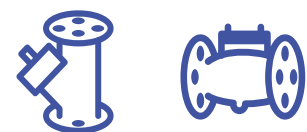

Specialised product

Needle valves, Monovar control valves
Actuated control valves

Filters

Y strainers - Mud boxes
Basket strainer

Backflow preventers

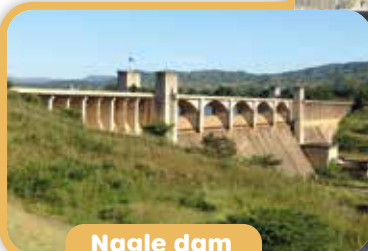

Anti water hammer valves Air valves - Safety valves

Anti water hammer valves - Air valves - Safety valves

Automatic control valves

Pressure reducing valves
Pilot operated control valves

Nagle dam

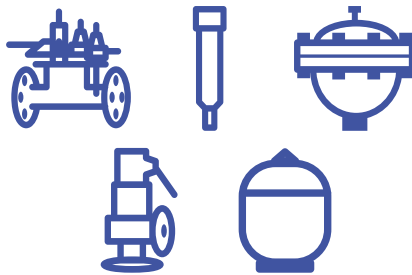

Buidling

Building

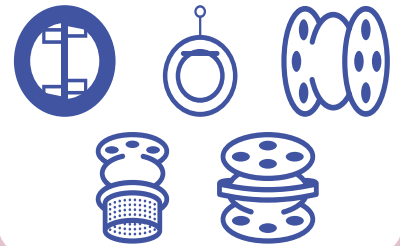

Anti water hammer valves Air valves - Safety valves

Anti water hammer valves - Water hammer arrestor
Air valves - Safety valves - Expansion vessels

Check valves

Wafer double door check valves
Wafer single door check valves
Axial guided check valves - Foot valves
Membrane check valves

Backflow preventers

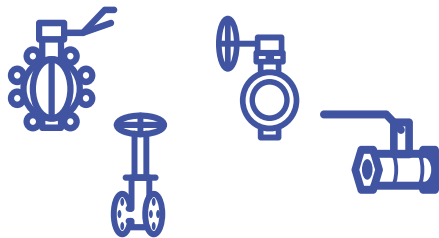

Filters

Y strainers

Shut off valves

Centric butterfly valves - Eccentric butterfly valves
Gate valves - Ball valves

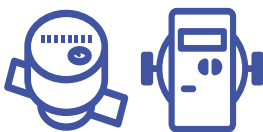

Instrumentation

Matic

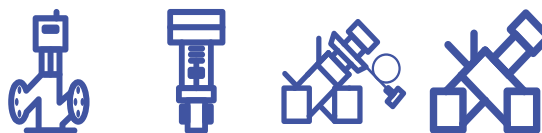

Metering

Water meters
Thermal energy meters

Control valves HVAC

Control valves - Pressure independent control valves -
Differential pressure control valves - Manual balancing valves -
Automatic balancing valves - Debugging instrument

Actuators

Electric actuators

Expansion joints

Rubber expansion joints
Metal expansion joints

Automatic control valves

Pressure reducing valves
Pilot operated control valves

Specialised product

Needle valves, Monovar control valves
Actuated control valves

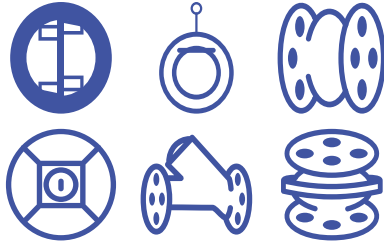

Data center

Industry

Check valves

Wafer double door check valves
Wafer single door check valves - Axial guided check valves
Disc check valves - Ball check valves
Membrane check valves

Anti water hammer valves Air valves - Safety valves

Safety valves
